

STUDENT REFLECTION

Foam Core Bungalow

Take 15–20 minutes to reflect on your build. There are no wrong answers — be honest. This is part of your final mark.

NAME		DATE	
DESIGN CHOSEN (circle one)	A · B · C	CLASS / PERIOD	

01. Why did you choose this design?

Think about your skill level, how much time you had, and what you wanted the model to look like.

02. What was the hardest part of the build?

Was it measuring? Cutting? Gluing? Keeping the walls square? Be specific about where you struggled.

03. What would you do differently if you started over?

Maybe you'd plan the layout differently, or pick a different design, or use less glue.

04. What skill did you improve the most during this project?

Examples: measuring accurately, using a knife safely, planning ahead, problem-solving on the fly.

05. Rate your finished model on a scale of 1–10 and explain.

Be honest. What do you genuinely like about it? What would you fix if you had more time?
