

ASSESSMENT RUBRIC

Foam Core Bungalow

Five criteria, four levels. Each criterion is worth 4 points. Total: 20 points, scaled to a final percentage.

STUDENT		DESIGN A · B · C		FINAL MARK	___ / 20
---------	--	------------------	--	------------	----------

CRITERION	LEVEL 1 50–59%	LEVEL 2 60–69%	LEVEL 3 70–79%	LEVEL 4 80–100%	MARK
Planning & Layout THINKING Choice of design suits skill level; cuts laid out on the foam core sheet to minimize waste.	Little planning evident. Pieces poorly laid out; significant waste of material.	Some planning. Most pieces fit but layout is inefficient or one piece had to be re-cut.	Clear planning. Layout uses material efficiently. All pieces fit on one sheet.	Excellent planning. Highly efficient layout with deliberate spacing. Design choice well-justified.	___/4
Measuring Accuracy APPLICATION Pieces match the cut list dimensions within ± 2 mm; corners are 90° where intended.	Multiple pieces off by more than 5 mm. Corners noticeably out of square.	Several pieces off by 3–5 mm. Some corners not quite square.	Most pieces within ± 2 mm. Corners square.	All pieces within ± 1 mm of the cut list. Corners precise. Walls plumb.	___/4
Cutting Quality APPLICATION Edges are clean and straight; door and window cutouts are neat; no torn foam.	Edges torn or jagged. Cutouts uneven or oversized.	Some edges rough. Cutouts visible but imperfect.	Clean edges throughout. Cutouts neat and properly sized.	Crisp, professional edges. Cutouts perfectly square. No tearing or compression.	___/4
Assembly & Finish APPLICATION Walls firmly glued, no gaps or excess glue; roof sits flush; model is sturdy and clean.	Visible gaps or weak joints. Excess glue throughout. Roof crooked or loose.	Some gaps or glue blobs. Roof generally sits but is not perfectly flush.	Tight joints, minimal glue visible, roof flush. Sturdy structure.	Seamless joints, no visible glue, roof perfectly flush. Looks professionally built.	___/4
Reflection & Process COMMUNICATION Reflection page completed thoughtfully; student followed safety rules and stayed on task.	Reflection mostly blank or one-word answers. Off-task often or unsafe practices observed.	Reflection partially complete. Mostly on-task; safety mostly observed.	Reflection thorough. On-task throughout. Safety rules followed.	Reflection insightful and detailed. Excellent focus, safety, and craftsmanship throughout.	___/4

TEACHER COMMENTS

Achievement Chart alignment: Thinking (planning), Application (measuring, cutting, assembly), Communication (reflection). Knowledge is assessed informally through the build process.
